

INSTRUCTION FOR MARRYAT LARGE ARBOR FLY REEL

Thank you for purchasing a Marryat Reel. This reel is set for right hand use at the time of your purchase, but can be changed to left hand use easily. In either hand, the click sound is designed to occur only in the direction the line is pulled out of the reel.

● Oiling

To ensure optimal operating conditions of your reel, it is advisable to apply a small amount of Teflon grease to the main shaft, and also one drop of machine oil to the one-way clutch (inside brake housing) and to the handle section.

● When you use the reel in saltwater

This reel has been developed mainly for use in fresh water. When you use it in saltwater, please be sure to remove the salt from the reel and line completely and dry it before storage.

● Cautions

- Do not hold the line when it is being pulled out of the reel quickly. The line may cut your finger.
- Do not place your finger on the spool when the line is being pulled out quickly (when the spool is turning in the reverse direction). Your finger may get burned or injured by being hit by the handle.
- Do not use the reel for other purposes than fishing.
- The rotary part of the reel is greased or oiled. Be careful not to stain your clothes.
- Be careful lest your finger get caught between the spool and line. It may cut your finger.

● How to Remove Spool

Turn the stainless screw, which is located in the middle of spool's handle side, counter-clock wise. Tighten the screw firmly when attaching the spool.

● How to Set for Left Hand Use

First, tighten the drag firmly. Then, turn the Drum Cover (C) counter-clock wise with your finger laid on the protrusion(C), until Click Ball (A) moves into (B).

● Drag Adjustment

The drag can be adjusted to any desired strength. It becomes stronger by turning the drag knob clock-wise.
